

I understand that the FCC is considering a proposal to increase service for LPFM stations. I listen to an FM station a minimum of twenty hours weekly and do not want this station to be adversely affected by your proposal. K-LOVE is my best radio source for news and information on matters that are important to me. I have donated \$500 yearly to fund this station and keep it on the air in this rural community. Without K-LOVE I and the others in this area will be required to find other sources for the same entertainment and news. I have certainly been unable to locate such a source on the radio. Nearly all of my listening is over the air at work. I am unable to listen on the Internet because of the type of work I do. K-LOVE is a non-commercial station supported locally by donations from local listeners. It would not exist if it were not valued by this community and many others across the United States. K-LOVE claims 1.5 million listeners nationally. Do you really want to make changes that would affect so many? I hope not. I ask you to reconsider this unfortunate proposal.
